Background: Heterogeneous nuclear ribonucleoprotein (hnRNP) A2/B1 is an important RNA-binding protein that affects the RNA processing, splicing, transport and stability of many genes. hnRNPA2/B1 is expressed during proliferation and metastasis of various cancer types and promotes such processes. However, the precise role and mechanism of hnRNPA2/B1 in breast cancer remain unclear.

A2. B1. B2. C1. C2. What are the CEFR Levels? CEFR stands for Common European Framework of Reference. The CEFR levels provide a way of describing a person's language proficiency. There are six levels: A1, A2, B1, B2, C1 and C2. A1 is the lowest level in terms of ability and C2 is the highest. Find out more.

Basisgebruiker A2 B1 - erk.nl HNRNP A2/B1 encodes for hnRNP A2 and its splicing variant hnRNP B1, which contains an additional 12 amino acids near the N terminus (Burd et al. 1989; He and Smith 2009). An unsolved question is the biochemical and biological differences between hnRNP A/B protein family members and their splicing isoforms.

In contrast, knockdown of hnRNP A2 inhibited the Ras-MAPK-ERK pathway and prevented ERK1/2 activation by EGF. Moreover, we found that hnRNP A2 regulates the splicing of A-Raf, reducing the production of a short dominant-negative isoform of A-Raf and elevating the full-length A-Raf transcript.

The process of alternative splicing is widely misregulated in cancer, but the contribution of splicing regulators to cancer development is largely unknown. In this study, we found that the splicing factor hnRNP A2/B1 is overexpressed in glioblastomas and is correlated with poor prognosis. Conversely, patients who harbor deletions of the HNRNPA2B1 gene show better prognosis

hnRNP A2/B1 and hnRNP A1/A1b are required for HCC tumor maintenance. To better understand the involvement of the different isoforms in liver cancer and to examine if hnRNP A1/A1b or hnRNP A2/B1 is required for maintenance of the transformed phenotype, we knocked down either hnRNP A2/B1 or hnRNP A1/A1b expression in the human HCC cell line HuH7 (Fig. 3 A).
