In this episode, host Joe Pronesti speaks with Ted Nee, who produces the line of firefighter simulation videos on the Fire Engineering site, and Bobby Halton.

The FIA: Promoting professional fire safety

Fire protection engineering is the application of science and engineering principles to protect people, property, and their environments from the harmful and destructive effects of fire and smoke. It encompasses engineering which focuses on fire detection, suppression and mitigation and fire safety engineering which focuses on human behavior and maintaining a tenable environment for evacuation ...

Fire Engineering Practise A Uk

What is a Fire Engineer. It is not an easy task to define fire engineering which should become clear when the following is considered. It could be argued that any person involved in the fire safety industry could call themselves fire engineers and because they do not belong to a professional body does not negate this.
